Doc Sprint

# Agenda at a glance

1. Wassup?

2. Get s#it done.

1st European Web Platform Doc Sprint, February 8/9 2013, Berlin, Germany

1. Wassup?

2. Get s#;t done.

**3. Go out & PARTY!**

This event is highly dependent  
on a speedy uplink to the Intertubes!  
We are linked up with two times  
50 MBit/s Down & 5 MBit/s Up.  
**Pleeeeee use that bandwidth wisely.**

Use copper over wireless.

Disable any personal hotspots/MiFis.

Make use of the good cell coverage.  
Turn off any sync services.  
Turn off E-Mail.

**Avoid any unnecessary traffic.**

# WebPlatform.org

## Doc Sprint: Work Plan

**WebPlatform.org**

The two focus groups we have today are:

- The API reference group
- The CSS property reference group
- (float from one to the other if wished)

There are a lot of APIs we want to cover on WebPlatform.org, with docs at different stages. To get started:

- Read the **API project plan: [wpd.mx/APIpr](http://wpd.mx/APIpr)**
- Read our **Guide to creating API pages [wpd.mx/APIgd](http://wpd.mx/APIgd)**
- Choose what you want to work on
- Let us know, and get going!

Your main contact for the API focus group:  
Scott Rowe.

There are a load of CSS properties to cover, and we need your help! To get started:

- Read the **CSS project plan: [wpd.mx/CSSpr](http://wpd.mx/CSSpr)**
- Read our **Guide to CSS property pages [wpd.mx/CSSgd](http://wpd.mx/CSSgd)**
- Choose what you want to work on (concentrate on highest priorities first)
- Let us know, and get going!

Doc Sprint

# CSS properties

Your main contact for the CSS focus group:  
Chris Mills.

## Don't want to do API/CSS docs? How about

- Fixing bugs
- Working on templates/extensions
- Writing some *different* docs
- Working on skinning
- You could also do *just* demos, or writing, or proofing...

Work how you want, as long as you are happy and productive!

Collaborate. Help each other!

Let us know what you're working on, and when you start new things.

## We are keeping it low-fi during the sprint!

- Grab a steward
- Raise your hand
- Talk to others next to you
- Don't be afraid — we won't bite (much)

**Thanks!**  
**Questions?**

**WebPlatform.org**

Doc Sprint

**This is for the newcomers!**

Those of you who are already experienced  
with using WebPlatform.org  
can now get started.

# WebPlatform.org

## Beginners: Getting Started

**WebPlatform.org**

You'll need a free WebPlatform.org account:

- Go to [docs.webplatform.org](https://docs.webplatform.org)
- Hover over **Log in**
- Click the **Create account** link
- Fill in and submit the form

## We track site bugs at W3's Bugzilla:

- Go to [w3.org/bugs](http://w3.org/bugs)
- Click [Open a new Bugzilla account](#)
- Follow the instructions

- Log in
- Note the root of the Wiki is at <http://docs.webplatform.org/wiki/>
- **Review the site structure** at Meta:Editors\_Guide/Topic\_Hierarchy [wpd.mx/SiteStr](http://wpd.mx/SiteStr)
- **Read the editor's guide** at WPD:Editors\_Guide -> [wpd.mx/EdGd](http://wpd.mx/EdGd)

- You need to be logged in before you can edit things
- When making **major edits** or adding a new page, **work offline on a text editor**
- If you want to **move** or **delete** pages, **talk to us first**
- It's Media Wiki based!

- (Almost) no tags needed
- \* and # for bullets and numbers
- =x=, ==x==, etc. for heading levels
- ''x'' and '''x''' for bold/italic

- `[URL link-text]` for external links
- `[[relative-URL|link-text]]` for internal
- `[file:filename.xxx]` for embedding files
- Tables are horrible

- `<syntaxHighlight></syntaxHighlight>` for code blocks
- `<code></code>` for inline code
- Use `<div>` and `<span>` to hang `style=""` off, for bespoke styling
- Use proper list markup for complicated lists
